

# CCEC Directors Recognized

*40 years of combined service*

**On December 19, Coleman County Electric Cooperative Directors Roger Kruse, Glen Scarborough and Anthony Strawn were recognized for their years of service.**

Receiving awards were Strawn, who represents District 5, with 20 years of service; Kruse, the board vice president from District 2, with five years of service; and Scarborough, District 9, with 15 years of service. Thank you for enhancing the quality of life for our members and employees through leadership and innovation, which continues to fulfill our mission statement.

# CCEC Employees Recognized

*85 years of combined service*

**At a meeting on December 20, Coleman County Electric Cooperative honored employees for their years of service.**

Those who reached a milestone in their careers were Purchasing and Warehouse Superintendent Jerry Campbell, 35 years; Bookkeeper/Accountant Kim Stovall, five years; 1st Class Lineman Kelly Smith, five years; Office Manager Synda Smith, 15 years; and Equipment Operator Ronnie Daniels, 25 years.

Congratulations to those receiving this year's award and thank you for your hard work and being dedicated employees to your member-owned electric cooperative.

# CCEC Offering Scholarships to Graduating Seniors

Scholarship applications are available for 2014 high school graduates who will be attending a college, technical school or university as freshmen.

Other qualifications:

- ▶ You must be a child of a member, a grandchild of a member, or child of a legal guardian who is a member of Coleman County Electric Cooperative.
- ▶ You must reside with the active member and within the Coleman County Electric Cooperative service area.

Eligible applicants will be placed in a drawing to be held in July at the cooperative's annual meeting. There will be nine separate drawings, each scholarship totaling \$500. Deadline is June 30, 2014.

For an application, visit [colemanelectric.org](http://colemanelectric.org), or contact Tony Williams at (325) 625-2128 or [tony@colemanelectric.org](mailto:tony@colemanelectric.org).

## Dodging Drafts?

*Cold spots can indicate need for insulation, air sealing*

**If some of the rooms in your house are too cold while others are too hot, you might need more insulation in your attic. Cold air that seeps into your attic doesn't have to find its way into the home's living space. Adequate attic insulation, properly installed, can catch it.**

If your floor is so cold you have to wear socks with your slippers, check the insulation level in your basement or crawlspace. Just as cold air in the attic doesn't have to make your home cold, neither does cold air from the crawlspace.

If your heating bill shows a sudden spike, it's possible your home's ductwork has cracks or kinks or is missing some of its insulation. Get the ducts inspected by a qualified HVAC technician.

If some rooms in your home are drafty, that could be a sign that the insulation level in the walls is too low or that cold air is leaking into your home through windows or wall penetrations around electric outlets. Seal wall penetrations with caulk and weatherstrip your doors.

## Did You Know...

**You can save money while watching television by switching to the energy-saving mode, which dims the backlight and reduces power consumption by about a third.**

But the biggest energy saver is to shut off the set and unplug it when nobody's watching it. That's good practice with gaming consoles and other electronics as well.
