

National Lineman Appreciation Day

AMERICA'S ELECTRIC COOPERATIVES DESIGNATED the second Monday of April each year as National Lineman Appreciation Day.

On April 13, Coleman County Electric Cooperative honors the hardworking people who often work in challenging conditions to keep the lights on.

To mark the occasion, the National Rural Electric Cooperative Association unanimously adopted this resolution:

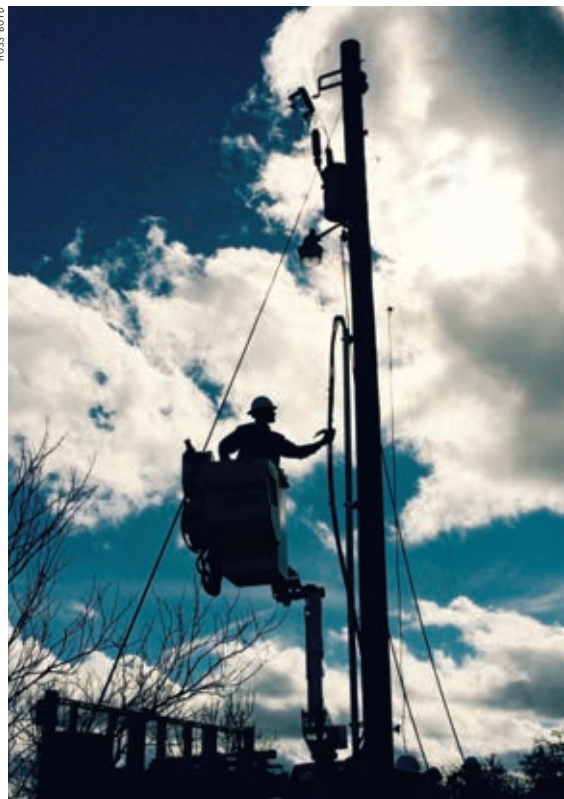

“Whereas linemen leave their families and put their lives on the line every day to keep the power on; whereas linemen work 365 days a year under dangerous conditions to build, maintain and repair the electric infrastructure; whereas linemen are the first responders of the electric cooperative family, getting power back on and making things safe for all after storms and accidents, and; whereas there would be no

electric cooperatives without the brave men and women who comprise our corps of linemen;

“Therefore be it resolved that the NRECA recognizes the second Monday of April of each year as National Lineman Appreciation Day ... to recognize the contributions of these valuable men and women to America’s electric cooperatives.”

Co-ops everywhere proudly acknowledge all electric lineworkers for the services they perform around the clock in dangerous conditions to keep power flowing and protect the public’s safety.

“Electric lineworkers do not often receive the recognition they deserve,” said CCEC General Manager Clint Gardner. “They work all hours of the day, often in hazardous conditions far

On the second Monday of April, co-ops across the nation recognize the sacrifices made by their electric linemen.

from their families, going above and beyond to restore power to their communities. Our linemen, as well as linemen from across the nation, truly deserve this special day of recognition.”

Coleman County EC invites our members to take a moment and thank a lineman for the work they do. If you use Twitter, you can use #ThankaLineman to show your support. Or you can simply tell the next lineman you see how grateful you are for the men and women who power our lives.

Power Tip

New and improved lightbulbs can reduce your lighting energy use between 35 and 80 percent. Choose from an increasing number of energy-efficient halogen incandescents, CFLs and LEDs.
